

J Type ADSS Suspension Clamp, UV Resistance

Applications

ADSS suspension clamp is used to support or clamp ADSS on the pole or towers during aerial FTTH line constructions, usually can be installed on short spans at intermediate routes.

Installation

Unscrew the nut, move the bolt and take out the polymer gasket. Put the fiber cable into the gasket and insert it into the clamp, then tighten the screw.

General Specification

Gasket Material	Thermoplastic Elastomer (TPE)
Metal Material	UV Resistance
Clamp Size	Galvanized steel
Compatible Cable Type	128*75*35 mm
Breaking Load	Round Cable
Compatible Cable Size	3.5 KN
	10 – 15 mm
