

Pole Bracket for Drop Cable Clamp

Applications

Pole brackets are used in the telecommunications and cable industry. Its primary application is to securely fasten and support drop cables on utility poles or other structures

Installation

It is mounted to the wooden or concrete pole with screws or strapping band. Then, other components of the overhead networks can be mounted to the bracket, such as dead end clamps, which are used to tension the cables between the spans.

General Specification

Material	Galvanized Steel
Bracket Dimension	66*66*55 mm Nominal
Breaking Load	1.5 KN
Weight	125 g Nominal
