

Square Cable Clip, 5.4*3.6mm Path, 1.8*17mm Nail, PE

Applications

Cable clip, mainly used for indoor wiring along the wall. Unlike the cable tie needs to use a tie mount to bundle cable on the wall, cable clip can achieve it alone. According to the way of use, they include some that you can hammer into the wall with one nail or stick down with a self-adhesive.

Installation

Put the cable under the clip and hammer the nail into wall to fix the cable.
