

## Dead End Grip for Short Span ADSS, Galvanized Steel, 410mm

### Applications

Dead end grip other called preformed wire grip, is developed to use in overhead telecommunication networks or electrical power distribution line to tension bare and insulated conductors on towers or wooden poles.

### Installation

Attach the cabled loop to the Thimble. Intertwist the cable with two legs of grip, then use the U-Clevis to fix the grip on the pole.

### General Specification

Material	Galvanized steel
Grip Length	410 mm
Rod Diameter	2.2 mm
Number of Rods	5
Compatible Cable Type	ADSS
Compatible Cable Diameter	9.4-10.4 mm
Colour Code	Red
