

### Strapping Band Teeth Buckle, 304 Stainless Steel

#### Applications

In order to use stainless steel banding and straps, one needs an equally strong clamp to hold these straps in place. Stainless steel buckles are manufactured from high quality stainless steel to match the stainless-steel strip.

#### Installation

Insert one end of the band into the buckle and bend the end under the buckle, then insert another end of band to the buckle and hammer the two ears of buckle to fix.

#### General Specification

Material	304 Stainless Steel
Dimension	40.5*27.0*11.8mm Nominal
Thickness	1.5mm Nominal
Compatible Band Type	3/4" (19mm)
