

0.03" Thickness, 3/4" Width, Stainless Steel Strapping Band, 304 Stainless Steel

Applications

Stainless steel strapping band is an excellent general purpose metal zip tie. It's suitable for working in various environments, even in the most extreme temperatures and harsh environmental conditions. These bands are ideal for bundling and fixing various cables, wires and components. Such as bundling the suspension clamps, anchor clamps, and hooks, on dead end and intermediate routes of main or end using electrical connectors.

Installation

According to the size of pole to measure the band length, cut the band by strapping band tension cutter, then insert one end of the band into the buckle and bend the end under the buckle to fix; Attach the band on pole by insert another end of band to the buckle; Next tighten the band and cut extra band by tension cutter; At last, hammer the two ears of buckle to fix.

General Specification

Material	304 Stainless Steel
Width	3/4" (19 mm)
Thickness	0.03" (0.76 mm)
Packing	Plastic Box
Length	30 m
Weight	3.8 kg
